

### Facts & Figures

**Project Duration**  
2023 - 2030

**Client**  
BVG (Berliner Verkehrsbetriebe)

**Location**  
Berlin, Germany

**Investment - ca.**  
Not yet published

**Project Area - ca.**  
160.000 m<sup>2</sup>

**Services**  
Project management/Steering, BIM Management, BIM Coordination for Machinery and Commissioning

## Berliner Verkehrsbetriebe (BVG) – Programm U-Bahn Werkstätten

"More than 10 buildings, 5 Projects, 3 different sites, for 1 city"

Berliner Verkehrsbetriebe (BVG) has launched the "U-Bahnwerkstätten" project to comprehensively modernize the U-Bahn operating workshops at the Berlin Britz-Süd (BWBRs), Berlin Friedrichsfelde (BWF) and Berlin Charlottenburg (MACH) locations. The project includes the new construction, expansion, conversion, refurbishment and modernization of these workshops as part of the Workshop Program 2030. As the commissioned partner, we are responsible for project management and BIM management and steer the successful implementation of this infrastructure project with a holistic approach.

### Particular challenges & solutions

**Multiple locations**  
Development of an overarching multi-project management strategy for uniform control

**Digitalization & BIM**  
Implementation of end-to-end BIM processes to optimize planning and construction processes

**Operation during the construction phase**  
Planning of interim solutions to ensure the workshop functionality

With our expertise in project management for major infrastructure projects, we support BVG on its way to modern, future-proof U-Bahn stations and make an important contribution to sustainable mobility in Berlin.
